

HARSHIT YADAV

Backend Engineer | Node.js, TypeScript, PostgreSQL | Microservices & Distributed Systems

+91-9068124480 | harshitcodex@gmail.com | harshitcodex.dev | linkedin.com/in/harshitcodex | github.com/harshit-codex

PROFESSIONAL SUMMARY

Backend Engineer with 3+ years shipping production SaaS platforms across LegalTech, EdTech, and Healthcare, including REST APIs, microservices, payment systems, and AI-integrated features. Strong in system design, database architecture, and cloud deployment, with a track record collaborating with US-based remote teams from architecture through production support.

EXPERIENCE

Backend Engineer | Internet Division

Sheridan, WY, USA (Remote) | March 2026 - Present

- Architected backend services using Node.js, NestJS, and PostgreSQL for two production SaaS platforms: an LMS marketplace and a legal-tech case management system.
- Built payment and payout infrastructure across 2 payment processors (Stripe Connect and Authorize.net), including webhook-driven order processing, payouts, and affiliate commission tracking.
- Established multi-tenant security using Supabase JWT and PostgreSQL Row-Level Security, integrating 3 external services (Claude, Firma.dev for e-signature, and document delivery) to automate workflows.
- Provided ongoing production support across both platforms, resolving deployment and infrastructure issues within a remote, US-based team.

MERN Stack Developer | Empiric Infotech LLP

Surat, India | February 2025 - February 2026

- Developed an AI-powered risk analysis feature for a healthcare documentation platform, flagging risk factors from patient data using Node.js, NestJS, and PostgreSQL.
- Owned the notification and background job systems within a team-designed, event-driven microservices architecture for a mobile health-tech platform.
- Designed the event-driven communication layer using AWS SNS/SQS, processing 20,000+ notifications per day.
- Migrated large-scale React Native apps to modern Expo architecture.

Full Stack Developer | AppMixo LLP

Surat, India | July 2023 - February 2025

- Created real-time messaging systems using Node.js, MongoDB, Twilio, and WebSockets.
- Delivered integrations with 2 e-commerce platforms (Shopify GraphQL API and eBay), with automated product synchronization.
- Optimized backend APIs and reporting dashboards, improving database performance for enterprise clients.

PROJECTS

MyAyur | Health & Wellness Mobile App

Role: Backend Engineer

- Helped design the microservices architecture as part of a 3-engineer team: an event-driven system on AWS ECS Fargate, with services communicating through an SNS to SQS fan-out layer instead of direct calls.
- Owned the Notification microservice, batching related alerts intelligently and rate-limiting calls to 3 channels (WhatsApp, email, push) before dispatch.
- Owned the Background Tasks microservice, using EventBridge-scheduled, region-aware jobs to generate personalized recommendations through a TDEE-based meal-planning algorithm.

GigRocket | Learning Management & Course Marketplace Platform

Role: Sole Backend Engineer

- Owned GigRocket's backend end to end: designed the data model (27-table PostgreSQL schema) and built 200+ REST APIs powering the platform.
- Rolled out Stripe Connect marketplace payments with dual-sided webhook handling, instructor payouts, and rolling reserves for chargeback risk.
- Designed an anomaly-detection layer for fraud signals and shipped an 11-API guest checkout flow, removing forced signup from the purchase path.
- Managed deployments across 3 environments (development, staging, production) with GitHub Actions CI/CD, including automated database migrations.

TECHNICAL SKILLS

Languages: JavaScript | TypeScript | C++ | SQL

Backend: Node.js | NestJS | Express.js | REST APIs | GraphQL | Microservices | Event-Driven Architecture | WebSockets | Agile/Scrum

Databases & ORM: PostgreSQL | MongoDB | MySQL | Redis | Supabase | Drizzle ORM | Prisma

AI & Payment APIs: Claude API | OpenAI API | LLM Integration | Prompt Engineering | Stripe (Connect, Checkout, Billing, Webhooks)

Cloud & DevOps: AWS (EC2, ECS, S3, CloudFront, SNS/SQS, EventBridge) | Docker | GitHub Actions | CI/CD | Linux | Nginx

Frontend: React.js | Next.js 14 | React Native | Expo | Redux | Tailwind CSS

Tools: Firma.dev | Dropbox API | Git | GitHub | Postman | Swagger

EDUCATION

Bachelor of Technology in Computer Science Engineering | AKTU, Lucknow

CGPA: 7.81 | 2019 - 2023
